

SKINCARE LAYERING ROUTINE ORDER

LIGHTWEIGHT FOUNDATIONS

When learning how to layer skincare products, always begin with the lightest, most water-based steps. These products absorb quickly and prepare your skin for the treatments that follow.

1. CLEANSER

Morning: use a gentle cleanser to remove overnight oil.

Evening: double cleanse if you've worn makeup or sunscreen.

2. TONER or ESSENCE

Lightweight hydrators that balance pH and add the first layer of moisture.

3. SERUMS (ACTIVES)

Apply targeted treatments like Vitamin C (AM), niacinamide, hyaluronic acid, or retinol (PM).

 **Remember:** Lightweight products always go first—this is the “light” side of the layering spectrum.

SEAL & PROTECT

4. EYE CREAM

Light formula absorbs before creams.

5. MOISTURIZER

Locks in hydration and actives.

6. FACE OIL (OPTIONAL, PM ONLY)

Seals in moisture overnight.

7. SUNSCREEN (AM ONLY)

The essential final shield.
